Looking for a video editor who is proficient with creating YouTube videos. Expertise in Final Cut or some other similar program would be a plus. This is a relatively easy project involving creating 3-5 minute video montages of travel destinations from still images and short video clips that I will provide. This will also involve simple word graphics and scrolling credits. I will also provide stock music. These will be on an as-needed basis, perhaps once a month or more. \$40 per completed video including revisions and uploading. Looking for someone who is easy to work with, reliable, and familiar with creating this kind of video. If interested, please email thetraveler7761@yahoo.com.
